## The Ultimate 2 in 1 Laundry Solution in One Compact Unit!

Fagor's new washer-dryer combination units feature the benefits of two appliances in one space-saving machine. These smart front loading units perfectly accommodate apartments and small spaces and eliminate the need to wash your clothes, remove them from the washer and place them into a separate machine for drying.

Available in classic white or silver, the units feature a large 13 lb wash capacity in the **most compact footprint of three cubic feet**, ideal for taking your clothes & linens straight through the entire laundering process. Alternatively, simple presets allow for standalone washing or drying cycles if desired.

A **built-in anti-crease reversing system** creates an intermittent rotation of the stainless steel drum in both directions. This helps to prevent wrinkles from forming and separates the garments during the drying cycle.

Another notable feature is the units **Advanced Balance System (ABS)**, which electronically controls and balances weight distribution within the unit. This allows for superior performance, and its robust structure considerably reduces noise level and vibrations.

Other excellent features include an informative LCD screen with 16 programs, including quick wash and hygenizer cycles, a 180 degree door opening which makes loading and unloading an easy task and delayed start of up to 24 hours allowing you to make better use of your time.

The unit also features programmable spin speed regulation from 400-1200 RPMs.

Additionally, it is not necessary to ventilate your laundry while drying with this unit. Enjoy the peace of mind that the drying system simply condenses the hot air produced into water and automatically drains it away to a separate compartment. This allows for convenient installation because there is no need to install exhaust ductwork.

For those in need of a larger capacity laundry solution, Fagor also offers a line of stand alone washing machines and dryers.

The washer-dryer combination unit is scheduled for release in Fall 2009 but will be previewed at the upcoming KBIS show in Atlanta, GA May 1-3, 2009. For more information, please visit: [www.fagoramerica.com](http://www.fagoramerica.com), or call 201.804.3900.

#### **About Fagor America Inc.**

Fagor America Inc, headquartered in Lyndhurst, NJ, USA is a wholly owned subsidiary of Fagor Electrodomesticos, Spain. The Fagor brand is marketed in 100 countries. Fagor Electrodomesticos employs more than 12,000 people in 17 countries and operates 16 factories in three continents. Fagor is the worldwide leader in built-in induction cook tops, the leading appliance manufacturer in both Spain and France and the fifth largest appliance manufacturer in Europe.
